Pay Bill (Use
Rayzor Pay Api)
```
                                                                    Signature

Company Name
GSTIN: display sign
Company Account number:

                        Thanks In advanced

Admin Role Shot Details :

Login with username and password.
Can create users and managers → create with user-> username,password for users and
managers.
Settings→ Can change password, Can block/release managers/users
Can view all details of users/managers created by him

Add options like admin can add their product details with product name,quantity, delivery time , rate of value and discount value
Admin can view order history,payment details and wallet.

Admin can generate bills and send them to the user.
Chat option : for communicating between admin/users/managers

Note : these products will be displayed to users only who have been created by the concerned admin.
ie IE. consider admin 1 has created userA, Admin2 has added products , here Admin 1 products only will be displayed to UserA, admin2 products won't be displayed to UserA.
Same for managers too, managers who can be created by concern admin only can take care of their work.

Note: If Admin2 Product details are to be displayed to UserA, then he needs to contact Super admin.

User role Shot details:
User logins with username and password
In settings user updates name,email id,password,propic(optional),address,phone number, member id,upload aadhar pic,pan card pic, update aadhar num and pan num.

Show bills options→ here the bills which are sent by admins are displayed and user can pay those bills. Can view history/past bills.

Chat option : for communicating between admin/users/managers

In Dashboard → Display products listed by admin.user can add products to cart and can buy
Set delivery address and processed. Once processed is clicked, a bill is generated and show pay on delivery/pay now option. Once the process is done send notification to admin
(Here pay delivery/pay now option to be set by admin)

Managers : logins with username and password
In settings Managers update name,email id,password,propic(optional),address,phone number, member id,upload aadhar pic,pan card pic, update aadhar num and pan num.

Show bills options→ here the bills which are sent by admins are displayed and managers can track whether the user has paid those bills. Can view history/past bills.
Also Managers can close the users bill as settled when user come in person and pays bills
 (paid required is sent to admin and if admin approves then it's meant as bill is settled)
